

OduDoc

Full Platform Feature Catalogue

Admin panel · Patient portal · Doctor portal · Clinic portal · Corporate / Enterprise · Mobile apps

Platform tier	Healthcare ERP + EMR + Telemedicine + AI
Modules shipped	150+ admin modules · 30+ patient modules · 18 doctor modules
Booking channels	Web · Android · iOS · Voice IVR · WhatsApp · SMS
Geographies	India (primary) + 18 countries with localized tax engine
Languages	English · Hindi · Tamil · Telugu · Marathi · Bengali · Gujarati
Payments	Cashfree (INR/UPI/RuPay) · Stripe (international) · Manual
AI engine	Gemini-backed: triage, prescription assist, voice Rx, OCR, summarization
Compliance	ABDM / ABHA, IMC telemedicine, HIPAA-aligned audit log, DPDP

Generated 18 May 2026 · This catalogue describes the complete shipped surface area of the OduDoc platform, organised by user role.

Contents

1. Platform Overview

Architecture, multi-tenant model, security posture

2. Patient Portal

31 self-service modules a patient gets out-of-the-box

3. Doctor Portal

Workflow tools that save 3–4 minutes per OPD consult

4. Admin / Hospital Operations Panel

150+ modules covering every hospital workflow

5. Clinic Portal

Standalone clinic operations — smaller surface, same DNA

6. Corporate / Enterprise Panel

White-label, module-pick, multi-org billing

7. AI & Automation

Every place AI shows up in the product

8. Booking & Communication Channels

Web, mobile, voice, WhatsApp, SMS

9. Compliance, Localization & Payments

ABDM, IMC, DPDP, GST, multi-currency

10. Mobile Applications

Patient + Doctor Android/iOS apps

1. Platform Overview

OduDoc is a modular healthcare platform that combines telemedicine, electronic medical records (EMR), hospital ERP, pharmacy, lab, insurance, and AI in a single multi-tenant system. The same codebase serves three commercial tiers: direct-to-patient telemedicine, single clinics, and multi-org hospital enterprises.

Architecture & infrastructure

Runtime	Next.js 14 App Router on Vercel serverless. Edge-cached static surfaces (SEO pages, blog, directory) and Node.js runtime for stateful endpoints.
Storage layer	Race-safe append-only object stores (bindPersistentArray) with per-Lambda reload helpers (reloadConsultations, reloadBookings, reloadUsers, etc.) for cross-Lambda freshness.
Auth	NextAuth for web + JWT for Android/iOS apps + manager session cookies for clinic/hospital staff. Role-gated routes (admin / doctor / patient / clinic-manager / corporate).
Realtime	Server-Sent Events (SSE) for in-app push, FCM for native Android push, Expo Push for cross-platform mobile.
AI	Gemini Pro via @google/generative-ai. Per-org credit pools, per-call usage logging, ML self-learning queue for prescription corrections.
Search & SEO	216 specialty×city landing pages, JSON-LD (Service, Physician, MedicalOrganization, BreadcrumbList, FAQ), dynamic sitemap, RSS feed, robots-aware.

Tenancy model

Patients	Self-serve consumers. Free signup, family accounts (kids, parents, spouse), can book with any doctor or clinic.
Doctors	Verified clinicians. Public profile at /doctors/, private dashboard, KYC + license verification, payout flows.
Clinics	Single-location clinics. Reception staff + manager roles. Calendar, OPD queue, billing, pharmacy, TPA empanelment.
Hospitals (orgs)	Multi-department, multi-bed enterprise. Full admin panel (150+ modules). Each hospital is an org with admins, doctors, nurses, pharmacists, lab techs.
Corporate buyers	Enterprise tier — cherry-pick modules, white-label branding, custom domain, dedicated AI credit pool, SLA-backed.

Security & compliance posture

Audit log	Every PHI access, role change, prescription edit, consent grant, and payment event is logged immutably with actor + timestamp + reason. Patient-visible audit log in /dashboard/audit.
Tracked changes	EMR edits use insertion/deletion markers (author + timestamp) like Word's track changes — doctors can see who changed what.

Consent & DPDP	Granular consent capture for data sharing, ABHA linkage, family-account visibility, marketing opt-in. Privacy requests workflow (delete-account, export-data).
Watermarked PDFs	Invoices, lab reports, prescriptions carry diagonal patient-name watermarks to deter resale and forgery.
Anti-counterfeit	Per-batch QR codes on Rx packaging verify against the dispensing pharmacy — patients scan to confirm authenticity.
Biometric emergency unlock	Patient can grant ER staff one-tap access to their entire record via biometric + OTP — full audit trail.

2. Patient Portal

Every patient gets a self-serve dashboard at /dashboard. Below is the complete module list as shipped today.

Bookings & consultations

Find a doctor	Search by specialty, city, language, fee, rating, availability. 216 SEO landing pages drive organic discovery.
Book consultation	15-minute slot ladder, 30-minute lead time, no double-booking. Two flows: specific-doctor or any-doctor-in-specialty (pool).
Cross-border eligibility	Indian-licensed doctors are gated to Indian patients per IMC telemedicine guidelines — enforced server-side.
Family accounts	Add kids, parents, or spouse as dependents. Switch active profile via cookie. Each dependent gets their own medicalId; bookings, prescriptions, and reports are scoped to the dependent.
Video / chat consult	Daily.co-powered video room with built-in chat. Doctor receives camera-ready waiting-room ping when patient joins.
Reschedule / cancel	Self-serve with refund-policy enforcement. Notifies the doctor and frees the slot.
Reminders	24h email + WhatsApp + SMS + push reminders. Suppressed if cancelled or marked seen.
Receipt + invoice	Auto-generated GST-compliant PDF invoice with patient-name watermark.

Medical records (longitudinal EMR)

Health passport	Single QR code that an ER team can scan to see allergies, current meds, conditions, blood type, emergency contacts — without unlocking the full record.
Prescriptions	Every Rx ever issued, searchable by drug, doctor, date. PDF download + e-pharmacy reorder button.
Lab reports	PDF reports auto-attached to the patient's record. Doctor-signed; flagged values highlighted.
Radiology	DICOM-viewer accessible from the patient side for X-ray, CT, MRI, ultrasound.
Documents vault	Upload prior reports, insurance cards, vaccination records. OCR-indexed (Tesseract).
Health timeline	Chronological view of every consult, lab test, prescription, vaccination, surgery. Filterable by year and type.
Vitals	Manual entry or wearable-synced (Fitbit / Apple Health / Google Fit) BP, HR, SpO2, glucose, weight. Trend charts.
Care plan	Doctor-assigned regimen for chronic conditions (diabetes, hypertension, asthma, CKD). Tasks + adherence tracking.
Allergies & problems	Drug + food + environmental allergies; problem list with onset date and severity.

Immunizations / vaccinations	UIP schedule for kids; flu / Covid / travel vaccines for adults. Auto-reminders for next dose.
Symptom log	Patient-side daily log fed into AI triage and shared with care team during chronic-condition follow-up.

Pharmacy & shopping

Reorder Rx	One-tap reorder of last active prescription. Routed to nearest partner pharmacy with delivery ETA.
E-pharmacy cart	Browse SKUs, prescription-gated checkout for scheduled drugs.
OTC shop	Wellness products, devices (BP monitors, glucometers, thermometers), supplements.
Anti-counterfeit scan	Scan QR on Rx packaging to verify authenticity + batch + expiry.
Rx fulfillment tracking	Status pings: confirmed → packed → out-for-delivery → delivered.
Medication adherence	Daily reminders to take meds. Skipped doses flagged to the care team for high-risk patients.

Diagnostics

Book lab tests	Browse tests by name, package, lab. Home sample collection or walk-in slots.
Lab results	Auto-PDF on result-ready; patient is SMS/email-notified.
Radiology booking	X-ray / CT / MRI / ultrasound bookings with imaging-centre map.

Payments & wallet

Wallet top-up	Single recharge via Cashfree (UPI / RuPay / netbanking) or Stripe (international). 5% bonus credit on every top-up.
Spend across services	Wallet pays for consults, pharmacy, labs, imaging — one balance, no per-service refills.
Refunds	Auto-refunded to the wallet for cancellations within policy; otherwise pro-rated.
Insurance & cashless	Add health-insurance card; if your TPA is empanelled with the clinic, claim is auto-routed.
Pre-auth	Pre-authorization workflow with TPA portal for planned admissions and surgeries.

Family, social & growth

Family page	Manage dependents, switch active profile, view a dependent's full record (only owner has access).
Refer a friend	Personal referral code. Friend gets discount; you earn wallet credit. Code redemption is tracked end-to-end.

Refer a doctor	Patients can nominate a doctor to join the platform. Onboarding kit sent on submission.
Quick actions row	Dashboard tiles for Book again / Reorder Rx / Refer & earn — the three most common actions.

AI-powered self-service

Symptom checker	Free-text or visual body-region picker. AI returns urgency, suspected specialty, red flags, suggested next step.
AI triage	Routes the patient to the correct department before booking — cuts mis-triaged OPD slots for hospitals.
ABHA / ABDM linkage	Link Ayushman Bharat Health Account, sync past records, opt-in to health-data sharing with consent.

Privacy & control

Audit log	Patient can see who accessed their record, when, and why — doctor, hospital, pharmacy, family member, ER staff.
Consent management	Grant / revoke per data type (consults, labs, Rx, imaging) per consumer (specific doctor, hospital, family member).
Share token	Generate a time-limited public link to a specific record for a non-OduDoc consumer (foreign doctor, insurer).
Delete account	Self-serve, gated on a 30-day grace + irreversible confirmation. Full export of PHI before deletion.

3. Doctor Portal

Doctors get a workflow-first dashboard at /dashboard/doctor. Designed to cut 3–4 minutes off every OPD consult and to scale from solo-practice telemedicine to a hospital chief of department.

Practice management

My consultations	Today, upcoming, past. Filter by status: requested, awaiting-doctor, in-progress, completed, cancelled. Pool tab for unclaimed specialty matches.
Patient list	All patients you have ever seen, with last-visit date, condition tags, outstanding payments.
Patient detail (EMR)	Complete longitudinal record: complaint, clinical, Rx (three physically-separated stores). Tracked-change edit history.
Calendar / availability	Weekly recurring slots + one-off blocks. 15-min ladder. Honors leave, OOO, and clinic-day overrides.
ID card	Auto-generated badge with license number, specialty, hospital affiliation. QR for instant verification.

Clinical AI

AI prescription assistant	Enter symptoms / age / sex / allergies. Returns up to 5 ranked diagnoses with confidence + rationale + red flags. Pick one; AI drafts investigations, drugs (dose/freq/duration), advice, and follow-up. All editable.
Voice prescription	Dictate in English / Hindi / Gujarati / Marathi / Tamil. Browser-native transcription → AI extracts structured Rx fields.
AI usage	Per-doctor credit ledger + cost-per-call breakdown. Hospital admin can override pricing for a doctor.
Personal dictionary	Per-doctor abbreviation expansions and drug-name aliases. Voice + typed inputs auto-expand.

Earnings & payouts

Earnings	Per-consult, per-clinic, per-month breakdown. Includes telemed + in-clinic visits + pool consults.
Statements	Monthly PDF statement with GST treatment for self-employed clinicians.
Payout	Bank-account linkage; weekly or monthly cycles. Withdrawal flow with KYC checks.
Five salary models	(Hospital-employed) Monthly fixed, per-patient fee, per-visit charge, hybrid, revenue share. Auto-computed against encounters + attendance.

Analytics & growth

Analytics	Consults / week, no-show rate, average ticket, top conditions seen, patient demographics, NPS.
Reviews	Patient ratings (5-star + free text). Reply privately. Public reviews surface on /doctors/.
Referrals	Receive referrals from other OduDoc doctors or partner clinics. Send referrals out via OduDoc network.
Profile (public)	Bio, qualifications, languages spoken, fees, availability. Edited via dashboard, served at /doctors/ with Physician JSON-LD.

Hospital-employed extras

Hospital Rx	Tied to hospital pharmacy / formulary. Auto-suggests in-stock alternatives if dispense is unavailable.
Roster & duty handover	See your roster, swap shifts with peers, structured handover at end of duty.
EMR integration	Patient lookups span the entire org, not just your panel. Permission-gated by role.

4. Admin / Hospital Operations Panel

150+ admin modules at /admin/<module>. This is the full hospital ERP — everything from bed census to biomedical waste. Modules are role-gated and toggleable per org (Enterprise tier).

Core clinical

Patients	Master patient index across the org. De-duplication, merge, alias tracking.
Appointments	Org-wide schedule across OPD, IPD, surgery, imaging, lab. Token numbers, OPD queue.
Encounters	Every patient touchpoint — OPD visit, IPD admission, telemed, lab draw, imaging study, ER triage.
Hospital Rx	Centralized prescription store. Cross-references formulary, dispensing pharmacy, and patient adherence.
Medical records (MRD)	Document indexing, file movement, retention policy, retrieval requests.
Discharge summaries	Templated discharge with diagnosis codes (ICD-10), follow-up, meds-at-discharge, watermarked PDF.
Consent forms	Templated — surgical, anesthesia, blood-product, telemed. Patient e-signature.
Allergies & problems	Active problem list per patient. Auto-pulls from intake forms and consult notes.
Immunizations	Vaccine cold-chain inventory + vaccination event recording.
Vitals & EWS	Early-warning score auto-computed from BP / HR / SpO2 / RR / temperature / consciousness. Alerts on threshold breach.

Inpatient & surgical

Wards & beds	Live bed-map per ward. Occupancy %, isolation flags, cleaning status, gender-segregation.
Bed census	Hospital-wide live census — admissions / discharges / transfers in the last 24h, occupancy trends.
Admissions (IPD)	Admit, transfer, discharge workflow. Tied to ward, attending doctor, primary diagnosis.
Surgery / OT	OT calendar by theatre, surgical team, consumables log, pre/post-op checklists, time-out compliance.
Surgery video	Cloudflare Stream / Mux upload + playback for OT recordings. Educational consent gated.
Pre-anesthesia	PAC workflow: history, exam, risk grade (ASA), anesthesia plan, fitness.
ICU / critical care	ICU patient-level dashboard with vitals trend, ventilator settings, fluid balance, sepsis bundle.
TeleICU	Remote ICU monitoring across multiple hospital sites by a central intensivist team.

Maternity / labor & delivery	Partograph, fetal heart-rate trends, delivery summary, post-natal care.
Dialysis	Per-session dialysis log, dry-weight trend, water-quality checks.
Wound care	Wound photos with measurement overlay, dressing schedule, healing-curve plot.
Pain management	Pain scores, opioid stewardship, regional-block tracking.
Physiotherapy	Exercise programs, session attendance, ROM progress notes.
Oncology / chemo	Regimen builder, cycle scheduling, body-surface-area dose calc, toxicity tracking.
Cardiology	ECG repository, cath-lab booking, post-PCI follow-up.
Endoscopy	Procedure scheduling, video capture, scope-reprocessing log.

Diagnostics & pharmacy

Lab orders	Order → sample → in-process → result → verified → signed report. STAT routing.
Lab tests catalog	Test master with reference ranges, sample type, TAT, price.
Pathology	Histopath case workflow with slide images and structured reports.
Radiology	Modality worklist (X-ray / CT / MRI / US), DICOM viewer, structured report templates, PACS push.
Pharmacy dispense	Rx-linked dispense at the window. Refill tracker. Counsels-needed flag.
Pharmacy inventory	Batch + expiry, FEFO picking, near-expiry alerts, narcotic register.
Inventory	Non-pharma consumables (gloves, syringes, gauze). Reorder points, suppliers, PO workflow.
Blood bank	Donor registry, crossmatch, component tracking, transfusion adverse-event log.
CSSD sterilization	Set tracking by load number, biological-indicator results, reprocessing audit.

Revenue & admin

Invoices	Patient + corporate + insurance invoices. Watermarked PDFs. GST or per-country tax applied automatically.
Billing	Line-item charging per encounter. Bundled packages. Discount workflow with approval.
Insurance / TPA	Empanelment registry, claim submission, pre-auth, deny/appeal, cashless coordination.
Corporate empanelment	Employer empanelment for OPD / health-check packages. Voucher codes.
Coupons & offers	Discount engine with capping, blackout dates, first-time-only logic.
AP (accounts payable)	Vendor invoices, payment runs, ageing buckets.

GL (general ledger)	Chart of accounts, journal entries, P&L, balance sheet.
Revenue dashboard	Daily / weekly / monthly revenue across all service lines, payer mix, denial trends.
Payouts	Doctor payouts, agent commissions, distributor settlements.
Withdrawals	Patient wallet withdrawals (if enabled), refund queue.
Razorpay / Cashfree go-live	Self-serve KYC + bank-account onboarding for new orgs.

Workforce

Staff	All employees: doctors, nurses, technicians, support. Roles, departments, contact details.
Credentialing	License upload, validity tracking, board-certification reminders, primary-source verification.
Roster	Department-wise schedule. Auto-roster honors leave, role minimums, fairness.
Auto-roster	AI-suggested roster respecting constraints (max hours, mandatory rest, skill mix).
Staff scheduling	Shift swap requests, leave applications, holiday cover.
Handover	End-of-shift structured handover per ward / department.
Payroll	Five salary models, attendance integration, monthly payroll run, payslip PDF.
Employee health	Staff vaccination, fit-to-work clearance, exposure-incident log.
Doctor invites	Send invite-to-onboard links to new doctors. Auto-creates a draft profile.

Facilities & compliance

Dietary orders	Per-patient diet (diabetic, soft, NPO, etc.), kitchen ticket, allergen check.
Biomedical	Equipment registry, AMC tracking, calibration log, breakdown tickets.
Biomedical waste	Color-bag segregation, daily weights, vendor pickup log, regulatory report (CPCB compliant).
Housekeeping	Room-cleaning schedule, terminal-clean tracking, response-time SLAs.
Linen & laundry	Linen counts in/out, soiled-clean cycle, loss reconciliation.
Infection control	Surveillance for HAI, isolation-precaution orders, hand-hygiene audit.
Antimicrobial stewardship	Restricted-antibiotic approval workflow, MIC tracking, formulary compliance.
Incidents	Patient-safety events, root-cause analysis, action plans, recurrence tracking.
Emergency codes	Code blue / red / pink / silver activation log + response audit.

Ambulance dispatch	Fleet tracking, call dispatch, en-route ETA, billing.
Medical gas	O2 / N2O / med-air consumption, manifold pressure log, cylinder inventory.
Mortuary	Body in/out register, release authorization, post-mortem coordination.
Mortality audit	Mortality review committee workflow, preventability grading.
Visitors	Visitor pass issuance, screening, ward visit-hour enforcement.
Quality	Accreditation tracker (NABH / JCI), KPI dashboard, audit findings, CAPA.

Specialized clinical

Cardiology	ECG library, cath-lab schedule, device-clinic follow-up.
Oncology	Tumor board case scheduler, MDT decisions, regimen library.
Tumor board	Multidisciplinary case discussion with structured outcomes.
Dental	Charting (FDI tooth notation), procedure plan, lab impressions.
Ophthalmology	Refraction, IOP, retinal-image attachment, OCT integration.
ENT	Audiometry, vestibular tests, sinus-imaging review.
Orthopedics	X-ray annotation, implant tracking, post-op rehab plan.
Psychiatry	Mood-tracking scales (PHQ-9, GAD-7), session notes (locked privacy tier).
Rehab	Functional independence measure (FIM), discharge readiness.
Pediatrics-specific	Growth charts (WHO/IAP), vaccination calendar overlay, parent-portal.
Geriatric care	Polypharmacy review (Beers list), falls-risk assessment, cognitive screening.

Clinical research & education

CTMS (clinical trials)	Protocol registry, subject enrolment, AE / SAE reporting.
Ambient bench	Research-bench specimen tracking.
Clinical pathways	Standardized care bundles by diagnosis; deviation tracking.
Health camps	Off-site camp planning, registration, basic-vitals capture, follow-up routing.
Education partner panel	External training partners, course catalog, learner records.

Patient-facing org tools

Reviews	Org-level review moderation, response templates, sentiment analytics.
Reception (front desk)	Walk-in registration, queue management, token printer, payment counter.

Ward reception	IPD-coordinator command center: live IPD board with color-graded patient status, one-tap specialist call, transfer, handover, discharge.
OPD queue	Public TV display, SMS 'your turn' pings, average-wait surface.
Mailbox	Inbound patient queries (email + WhatsApp), team assignment, SLA timer.
Feedback / NPS	Post-discharge survey, NPS score, complaint workflow.
Tickets	Internal support ticketing (IT / facilities / clinical).

Platform admin (super)

Super admin	Cross-org operations: create new orgs, suspend, audit cross-tenant access.
Platform audit log	All cross-tenant actions logged immutably.
Factory reset	Per-org wipe (test mode) with confirmation gate.
Demo wizard	One-click seed of demo data for sales demos.
Razorpay go-live	End-to-end onboarding for payment gateway.
AI pricing	Per-org AI credit pricing override.
AI usage	Org-wide AI usage analytics, top spenders, anomaly detection.
AI feedback	Doctor corrections to AI Rx drafts feed the ML self-learning queue.
Notifications	Cross-channel notification configuration: which events go where (email / SMS / WhatsApp / push).
Email / WhatsApp / SMS templates	Template editor, A/B testing, locale variants.
KPI dashboard	Operational KPIs — bed occupancy, OPD throughput, OR utilization, payer mix, AR days.
Subscribers	Mailing-list contacts; segmentation; double-opt-in.
Categories / tags / pages	CMS for the org's mini-website at /c/<slug>.
Branding	Logo, theme color, sub-domain, favicon, watermark text.
Customize	Module on/off toggles (Enterprise tier).
Network	Inter-org referrals, network-tier price agreements.
Vendors	External vendors (linen, biomedical, food). Contracts + AMC.
Vacancies	Job postings → /careers + jobs board.
Applications	Inbound resumes, screening pipeline, interview scheduling.
Documents	Org document library (SOPs, policies, certifications).

Privacy requests	GDPR/DPDP requests: export, delete, restrict. SLA-tracked.
Consent	Org-side view of patient consent grants.
Audit viewer	Read-only audit log explorer with filters by actor / action / patient.
Voice station	On-prem voice-bot configuration for IVR booking.
Voice	AI voice agent: outbound reminders, inbound bookings.
Media library	Logos, banners, marketing creatives, OG images.
Anti-counterfeit kiosk	In-pharmacy verification kiosk for QR-coded Rx packages.
Biometric kiosk	Walk-in patient biometric registration.
DHIS integration	Optional sync to national DHIS reporting systems.
Passport scan	Foreign-patient passport OCR for medical-tourism onboarding.
ABDM	ABHA linkage, FHIR exchange with the national health stack.

5. Clinic Portal

Standalone clinics get a slimmer surface than hospitals — same patterns, focused on single-location workflow. Sign in at `/clinic/<clinicId>/login`.

Daily operations

Dashboard	Today's appointments, walk-ins, no-shows, revenue, pending payments.
Reception	Walk-in registration, queue management, token printing, payment collection.
Calendar	Per-doctor or unified clinic view. Block leave / OOO. Online + in-clinic visits in one calendar.
Pharmacy	In-clinic dispensing, batch + expiry, narcotic register, OTC sales counter.
Referrals	Refer a patient to another clinic, hospital, or specialist in the OduDoc network. Track outcomes.

Insurance & cashless

TPA empanelment	Maintain empanelment list with discount %, contact, validity. Renew-within-60-days banner. Manager-only edits.
Cashless claim	Submit cashless claim to empanelled TPA. Pre-auth round-trip. Final-bill submission.
Patient insurance lookup	Patient adds card → clinic auto-detects if TPA is empanelled.

Manager-only

Staff	Reception + manager roles. Add / remove / rotate staff.
Earnings	Per-doctor + clinic-wide earnings, payouts to associated doctors.
Settings	Clinic hours, address, photos, public profile at <code>/c/<slug></code> .

6. Corporate / Enterprise Panel

Enterprise buyers (hospital chains, diagnostic groups, government health depts) license the platform a la carte. They get every admin module above plus the enterprise-only controls below.

Module catalogue (cherry-pick)

85+ modules	Toggle modules on/off per org via /admin/customize. Disabled modules don't appear in the sidebar or consume AI credits.
--------------------	---

Module groups	Core clinical · Inpatient & surgical · Diagnostics & pharmacy · Revenue & admin · Workforce · Facilities & compliance · Brand & public surfaces · Patient self-service · Hospital ops add-ons · AI metering · Booking channels · Pharma supply chain · Marketplace · Compliance & tax.
----------------------	--

White-label & branding

Org branding	Custom logo, primary/accent colour, favicon, watermark text. Applied across patient pages, Rx PDFs, invoices.
---------------------	---

Mini-website	Auto-generated public site at /c/<slug> with hero, services, doctors, gallery, reviews, contact, booking CTA.
---------------------	---

Custom domain	Map your own domain (Vercel-managed cert).
----------------------	--

Vacancies + careers	Org's job board at /c/<slug>/careers with applicant pipeline.
----------------------------	---

Press / blog / gallery	CMS-style pages, image gallery, blog posts, testimonials.
-------------------------------	---

Multi-org & federation

Org hierarchy	Parent → child orgs (hospital chain → sites). Cross-site patient lookup with consent.
----------------------	---

Network referrals	Refer in-network at agreed rates; track conversion + revenue share.
--------------------------	---

Federated billing	Roll-up invoicing to the parent for corporate accounts that span multiple sites.
--------------------------	--

AI & metering

AI credit pool	Pre-paid AI credits at the org level. Per-doctor sub-pools optional.
-----------------------	--

AI pricing override	Set custom rates per AI feature for this org.
----------------------------	---

ML self-learning queue	Doctor corrections → supervised fine-tuning queue (private to this org).
-------------------------------	--

Government / public-health

DHIS sync	Push aggregated indicators to national DHIS endpoints.
------------------	--

Health camps	Camp event management with offline-tolerant capture and follow-up routing.
---------------------	--

Pharma supply chain	Authorized-distributor registry, regulatory paperwork, anti-counterfeit verification.
----------------------------	---

19-country tax engine	Per-country GST / VAT / sales-tax rates, invoice format, currency, language.
------------------------------	--

Commercial controls

Tier-based pricing	Patient tier (free) · Clinic tier (subscription) · Hospital tier (full suite) · Enterprise (custom).
---------------------------	--

SLA monitoring	Uptime, response time, ticket SLA tracking with corporate-buyer visibility.
-----------------------	---

Dedicated support	Slack/Teams channel, named CSM, quarterly business review.
--------------------------	--

Data residency	Region-pinned storage on request (IN / EU / US).
-----------------------	--

7. AI & Automation

AI shows up in many places. This index lists every AI-powered feature so you can see the full machine-intelligence surface area.

AI symptom triage	Patient free-text or visual symptom selection → specialty + urgency + red-flag analysis. Gates emergency cases to call 108.
AI prescription assistant	Doctor enters symptoms → ranked diagnoses, drug suggestions, dose/freq/duration, advice, follow-up.
Voice prescription	5-language dictation → structured Rx draft. Browser-native transcription + LLM extraction.
Rx OCR	Upload old paper prescription → OCR + LLM → structured drug list importable into history.
Ambient scribe	Listen to consultation → auto-generate SOAP notes.
Wearable insights	Synced BP / HR / sleep / glucose → weekly AI summary + risk flags.
Lab-result summarization	Plain-language summary of complex panels for patients.
Discharge-summary draft	AI fills the discharge template from the encounter timeline.
AI voice agent	Outbound reminders + inbound IVR booking via Twilio / Exotel / Vonage.
AI feedback loop	Doctor corrections to AI drafts → ML self-learning queue → private fine-tune.
AI usage analytics	Per-doctor / per-org credit ledger, cost-per-call, anomaly alerts.
AI pricing override	Per-org custom rates.
AI symptom log analytics	Patient daily logs → trend extraction → doctor alert if deterioration.

8. Booking & Communication Channels

Booking channels

Web	/doctors / specialty pages / direct doctor profile / pool booking. Logged-in or guest with phone OTP.
Android app	Patient + Doctor apps. JWT-authenticated. Native push via FCM + Expo.
iOS app	Same parity as Android.
Voice IVR	Phone in, AI agent collects details, books a slot — Twilio / Exotel / Vonage routes.
WhatsApp bot	Conversational booking on the Meta WhatsApp Business API. Template-approved messages for reminders, OTP, receipts.
SMS	OTP, reminders, status pings. Fallback for non-WhatsApp users.
Embed widget	Drop-in <script> for clinic websites to embed an OduDoc booking flow.

Outbound communication

Transactional email	Welcome, OTP, booking received, payment receipt, reminder, prescription PDF, lab result ready, discharge summary.
WhatsApp templates	Pre-approved Meta templates for OTP, booking, reminder, refer-a-friend, lab-result-ready, Rx-ready, follow-up nudge.
Push notifications	Native push (FCM) + Expo push for web / mobile.
In-app SSE feed	Server-sent-events feed for desk apps (reception, ward coordinator).

Inbound

Mailbox	Inbound emails consolidated, auto-tagged by sender (patient / doctor / vendor), SLA-tracked.
WhatsApp inbound	Free-text patient messages flow to the org mailbox or auto-respond via FAQ bot.
Help / contact	/help and /contact forms with category routing.

9. Compliance, Localization & Payments

Compliance

IMC telemedicine	Indian Medical Council telemed guidelines enforced: doctor-license verification, no controlled-substance Rx in first consult, cross-border patient gate.
ABDM / ABHA	Ayushman Bharat linkage, FHIR data exchange, ABHA-card creation.
HIPAA-aligned	Audit log, role-based access, encryption at rest + in transit, business-associate agreements available.
DPDP (India)	Consent capture, deletion requests, data-fiduciary obligations.
GDPR (EU)	Export / delete / restrict workflows.
NABH / JCI	Accreditation-tracker module for hospital quality teams.
CPCB biomedical waste	Color-bag segregation log + monthly regulatory report.

Localization

19-country tax engine	Country-specific GST / VAT / sales-tax computation, locale-formatted invoices.
7 languages	English, Hindi, Tamil, Telugu, Marathi, Bengali, Gujarati. Navbar + patient-facing pages.
Currency	INR (Cashfree), USD/EUR/GBP/etc (Stripe). Per-org default currency.
Indian phone formats	Auto-format + validation for +91 numbers + alternate Indian carriers.

Payments

Cashfree	INR + UPI + RuPay + netbanking + cards. Webhook-driven payment confirmation with race-recovery.
Stripe	International cards / Apple Pay / Google Pay / SEPA / wallets.
Manual / cash	Front-desk cash collection with receipt printing.
Wallet	Single top-up funds all services; 5% top-up bonus.
Refunds	Auto via wallet for cancellations; gateway refund for direct-to-card.
Insurance cashless	Direct claim flow with empanelled TPAs.
Pre-auth	Pre-authorization workflow for planned procedures.
Wallet withdrawals	Patient-side withdrawal flow (where regulatorily allowed).

10. Mobile Applications

Patient Android / iOS	Find a doctor, book, video / chat consult, prescriptions, lab reports, wallet, family accounts, ABHA, wearables sync.
Doctor Android / iOS	Appointments, EMR, voice + AI prescription, e-sign, push notifications, earnings.
Reception / ward Android	Walk-in registration, queue, payment collection, IPD board, code-blue alerting.
Auth	JWT issued by mobile-auth endpoint; refresh tokens; biometric unlock.
Push	FCM (native tokens) + Expo Push (cross-platform). Per-channel: appointments / chat / promotions / system.
Offline	Optimistic UI for vitals / symptom log; sync on reconnect.
