

OduDoc

Complete Healthcare Platform — Feature Overview

200+	150+	10+	28
User-facing features	API endpoints	Distinct user roles	Feature themes

Telehealth consultations · Hospital operations · Pharmacy marketplace · AI-assisted clinical tools

1. Auth & Identity

FEATURE	DESCRIPTION	ROLES
Login	Email/password sign-in for all account types.	All
Patient Registration	Self-service patient account creation with email verification.	Patient
Doctor Registration	Doctor onboarding with credential capture; admin verification gate.	Doctor
Forgot / Reset Password	Email-link password recovery flow.	All
Email Verification	Token-based email confirmation at signup.	All
OTP 2FA for Consult	One-time passcode before joining consultation.	Patient

2. Doctor Discovery

FEATURE	DESCRIPTION	ROLES
Doctor Directory	Browseable list of doctors filtered by specialty and location.	Public Patient
Doctor Profile	Bio, qualifications, consultation fee, ratings, reviews.	Public
Specialty Browse	Curated specialty landing pages (cardiology, dermatology, etc.).	Public
Doctors by City	Location-based SEO pages for every supported city.	Public
A-Z Directory	Alphabetical doctor index.	Public
Online-Now Badge	Live presence indicator showing doctors available right now.	Patient
Pool / Instant Consult	"Any available doctor in this specialty" routing.	Patient

3. Booking & Appointments

FEATURE	DESCRIPTION	ROLES
Appointment Booking	Multi-step booking: specialty → doctor → slot → pay → confirm.	Patient
Free Consultation Window	Promotional period where consultations are complimentary.	Patient
Instant Availability Toggle	Doctors flip a 15-minute "available now" switch.	Doctor
Timetable Management	Doctors configure weekly schedule and slot length.	Doctor Admin
Appointment Reminders	Cron-based email/SMS reminders before appointments.	System
Reschedule / Cancel	Patient and doctor can reschedule up to cut-off time.	Patient Doctor

4. Video Consultation

FEATURE	DESCRIPTION	ROLES
Waiting Room	Pre-join screen with camera/mic preview.	Patient Doctor
Live Video Call	P2P video with Daily.co integration; demo fallback.	Patient Doctor
Presence Sync	5-second heartbeat tells each side when peer joins / ends.	System
Synchronized Hang-up	When either side ends the call, the other side disconnects too.	System
Call Controls	Mute, camera toggle, screen share, chat.	Patient Doctor
In-Call Chat	Text chat alongside video.	Patient Doctor
Doctor Notes Panel	Side panel: symptoms, diagnosis, treatment, investigations, medicines.	Doctor
Post-Call Summary	Duration, rating, prescription view.	Patient

5. Prescriptions & AI Clinical Tools

FEATURE	DESCRIPTION	ROLES
AI Prescription Helper	Gemini / OpenAI / Claude generate starter Rx from symptoms + diagnosis.	Doctor
Local Rule Library	Offline fallback suggestions for common conditions.	Doctor
Quick-Pick Chips	Tap-to-add common symptoms, diagnoses, investigations.	Doctor
Voice Prescription	Doctor dictates; speech → text parsed into medicines.	Doctor
Prescription Issuance	Rx attached to a consultation and surfaced to the patient.	Doctor
Prescription History	Patient's complete Rx archive.	Patient Doctor
Print / Save as PDF	Branded printable prescription format.	Patient
Upload Scanned Rx	Patient uploads external prescriptions.	Patient
Formulary	Pharmacy drug master list.	Pharmacist Admin
AI Document Analysis	Parse uploaded medical documents.	Doctor Patient

6. Pharmacy & Shop

FEATURE	DESCRIPTION	ROLES
Product Catalog	Medicines and health products by category.	Public
Vendor Storefronts	Each vendor has a branded subpage.	Public
Pre-filled Rx Cart	"Order from Rx" deep-links prescribed medicines into cart.	Patient
Shopping Cart	Persistent cart with quantity controls.	Patient
Checkout	Multi-gateway checkout: Stripe, PayU, IndusPays, ConnectPay, TazaPay.	Patient
Order Tracking	Status updates from placed → packed → shipped → delivered.	Patient
Offline Pharmacy Option	Print Rx and take to a local pharmacy.	Patient
Coupons & Promotions	Discount codes and campaigns.	Admin Vendor
Vendor Dashboard	Products, orders, inventory, payouts.	Vendor
Vendor Analytics	Revenue, top products, conversion.	Vendor
Stripe Connect Payouts	Automated vendor settlement.	Vendor Admin

7. Dashboards

FEATURE	DESCRIPTION	ROLES
Patient Dashboard	Appointments, consultations, prescriptions, orders.	Patient
Doctor Dashboard	Today's schedule, earnings, reviews, referrals.	Doctor
Doctor Earnings	Commission breakdown and payout history.	Doctor
Doctor Reviews	Patient feedback with reply option.	Doctor
Clinic Dashboard	Multi-branch appointment / billing / inventory overview.	Staff
Vendor Dashboard	Sales, inventory, order fulfilment.	Vendor
Role-Scoped Admin Sidebar	HR/Support/Pharmacist/Vendor see only their relevant sections.	All staff

8. Hospital Operations

FEATURE	DESCRIPTION	ROLES
Admissions & Discharge	Inpatient admission workflow and discharge planning.	Staff Doctor
Bed Census	Real-time bed occupancy by ward.	Staff Admin
Wards & ICU	Ward-level patient organisation and ICU tracking.	Staff Doctor
Encounters	Every patient visit logged with timestamps and notes.	Doctor Staff
Vitals Monitoring	BP, HR, temperature, SpO ₂ capture.	Staff Doctor
Nursing Care Plans	Shift-based task list per patient.	Staff

- Manager / Staff** → scoped administrative operations (admissions, billing, inventory, etc.).
- HR** → staff, scheduling, careers, credentialing.
- Support** → tickets, feedback, notifications.
- Doctor** → own consultations, prescriptions, earnings, reviews.
- Pharmacist** → dispensing, pharmacy inventory, formulary.
- Vendor** → own products, orders, payouts.
- Patient** → own appointments, prescriptions, orders, health records.

21. Technical Foundation

Framework: Next.js 14 (App Router) · TypeScript · React Server Components.

Auth: NextAuth with credentials + JWT sessions; role-based middleware guards.

Database: PostgreSQL via Drizzle ORM.

Storage: Vercel Blob for documents and images.

Video: Daily.co integration with demo-mode fallback.

Presence & Signaling: In-memory TTL map with 5-second polling heartbeat.

AI Providers: Google Gemini (free tier), OpenAI, Anthropic Claude — precedence-based fallback.

Email / SMS: Transactional messaging via configurable SMTP and SMS provider.

Deployment: Vercel with serverless functions; environment-scoped configuration.
